

Proactive contract maintenance

# MyMaintenance

## MyMaintenance overview

MyMaintenance provides a comprehensive repository of IT asset and contract information. It is designed to simplify the contract management challenge our customers face, while at the same time providing us insight into their entire IT environment, creating multiple revenue opportunities.

One of the key benefits of MyMaintenance is we are able to provide our customers a comprehensive portal in which they can view and collaboratively manage their asset and contract information. This allows us to create a closer connection with our customers while providing them a valuable service.

## What are the benefits to our customers?

### Ease of access

MyMaintenance is a SaaS-based platform accessible by your customers via a secure login. There is no limit to the number of customers that can log into and leverage the portal.

### Expertise

Our team of contract specialists engage with our customers to help them leverage the tool and achieve the cost and operational benefits associated with automation.

### Dashboard view

MyMaintenance provides our customers a dashboard view of their entire IT asset and contract environment. This provides the ability to manage contracts across multiple suppliers and levels of service from a single pane of glass.

### Cost benefit

Our customers receive cost savings by 1) ensuring that each IT asset is covered by the appropriate support level, 2) reducing labor by adding automation in the management and consolidation of support agreements.

Let us help you to easily manage and maximize IT assets to mitigate risk
