Data Center Networking

Logicalis helps organizations reach beyond service levels to adopt hybrid IT and multicloud frameworks and extend their network infrastructures to improve their business outcomes.

Overview

Network connectivity and uptime are no longer enough.

Where and how we work has changed. Workforces are becoming increasingly mobile and dispersed as people work from campus, branch, and home offices—and everywhere in between.

And digital innovation continues to surge, resulting in more data-intensive AI/ML- and cloud-powered applications, such as 8K ultra-high-definition video streaming, immersive AR/VR, gaming, self-driving vehicles, high-frequency stock trading, automation, IoT, etc.

Relying solely on traditional centralized applications in on-premises datacenters to deal with these fast-moving trends has become nearly obsolete. Savvy organizations demand greater agility, resiliency, and operational efficiency from their networks to support their digital transformation efforts and achieve a competitive advantage in today's fast-changing global business environment.

As a result, modern organizations are increasingly adopting hybrid IT and hybrid-cloud (we use hybrid around here – not multi!) frameworks and extending their network infrastructures to achieve their agility, flexibility, scalability, operational efficiency, and security goals and improve their business outcomes.

Intelligent Networking

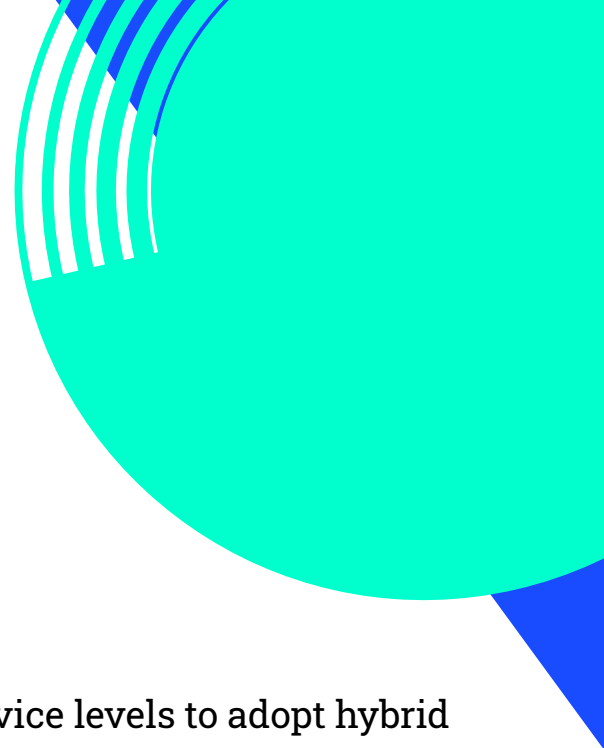

Logicalis can help you transform into a cloud-centric organization with hybrid IT and hybrid-cloud strategies that accommodate distributed hybrid-cloud applications and workloads across an increasing number of endpoints and locations.

We offer an advanced network platform that can take you beyond an acceptable level of service to the ability to quickly respond to changing business conditions, enable new operating models and services, integrate with IT processes, and safeguard your business.

This intelligent, intent-based network easily supports your organization by:

- Extending security to your remote workforce.
- Enabling a safe return to on-premises workplaces.
- Facilitating hybrid-cloud for greater business resilience.
- Automating IT operations for faster recovery and leveraging AI-powered analytics for smarter insights.

Logicalis can help you build a comprehensive hybrid-cloud based data network that can meet the requirements of cloud workloads—and your workforce's demands for continuously available, responsive, and secure access to cloud applications.

Benefits

- **Performance at scale** – Lay the foundation for a programmable intent-based network and meet the performance demands of modern applications.
- **Single global view** – Unify hybrid cloud and data center networks, application deployment, and performance to align with your organization's strategic objectives.
- **Intelligent automation** – Support both traditional and cloud-native applications with a consistent automated approach to operations and the ability to manage hybrid policies.
- **Consistent operations** – Empower IT to move at the speed of business with complete automation, extensive visibility, and consistent operations for your data center.
- **Fast response** – Respond quickly to new business needs, control IT costs, meet compliance requirements, scale, and continue business during disruptions.
- **Futureproof operations** – Take advantage of speed and feature updates without being forced into a forklift upgrade.

Technologies

- Cisco Nexus Switches
- Cisco Nexus Dashboard
- Cisco MDS Storage Area Networking (SAN) Switches
- Cisco Application Centric Infrastructure (ACI)

Services

Logicalis offers complete professional, consulting, advisory, and managed services for data center networking, including:

- Professional & Consulting Services
- Design, Integration & Deployment
- Workload Migration
- DevOps & Automation
- Managed Services
- Service Desk

Why Logicalis?

- **Long-term partnerships** – As one of just 5 Cisco Global Gold partners and ranked #12 of 67,000 Cisco partners worldwide, Logicalis works closely with key suppliers to solve customer challenges.
- **Award-winning** – Logicalis continues to receive recognition for networking solutions and services, including Cisco 2021 Enterprise Networking Partner of the Year and Leader in the IDC MarketScape: Worldwide Network Consulting Services 2021 Vendor Assessment.
- **Technology proficiency** – Logicalis brings a deep bench, including 250+ Cisco certifications and specializations such as Advanced Enterprise Networks Architecture Specialization, Advanced Security Architecture Specialization, and Master Security Specialization.
- **Services expertise** – Logicalis offers end-to-end services—from professional, advisory, and consulting services to managed services—to ensure our customers succeed and was recently named Channel Partner Insight 2021 MSP of the Year.
- **Customer success** – Logicalis provides service excellence and continuous quality and improvement using processes honed as a Cisco Lifecycle Advisor and holds the Cisco Advanced Customer Experience Specialization.
